

## ART SCHERBENSKE FAMILY

At the time of Tuttle's Golden Jubilee, Art was busy installing the plumbing at the Tuttle Cheese Plant. A few months later he was busy making cheese in the same place! Since the plant was short of help, he agreed to work there "till spring's work and digging starts." That was ten years ago and he's still there! He was made manager in 1962. After several years of coping with ancient equipment, and working endless hours, conditions gradually improved. New modern machinery, bulk tanks, bulk trucks and switching to barrel cheese all helped to make the work much easier. Today we live like a normal family, have normal hours, and even manage a vacation now and then.

During these busy years, our trio of children grew up, as children have a way of doing! Alan and Linda both graduated from Tuttle High School, with honors, in 1965 and 1966 respectively. Alan attended Jamestown College and got a Bachelor of Science degree in Business Education. He graduated Cum Laude in May of 1969, and

Left to right: Mr. and Mrs. Art Scherbenske, Mr. and Mrs. Les Kurtz, Alan, and Steven Scherbenske.

is presently teaching in the new Kenmare school system.

Linda went on to Westmar Methodist College in LeMars, Iowa. She majored in German and Math, and graduated, in May of 1970. She was married to Les Kurtz, of Kansas City on January 1, 1971. She is now teaching German at LeMars High School while Les finishes college.

Steve is a freshman at Tuttle High. He abhors school but taking part in basketball, track and other sports makes it at least bearable.

We still live just a hop, skip, and a jump west of the schoolhouse. The years go by! Most of them busy, happy, healthy years. Have a Happy Jubilee!
