

### ART SCHERBENSKE FAMILY

Since the last jubilee in 1971, Lynora and Art have both continued to work at Tuttle Dairy, as manager and bookkeeper. Both could retire but feel they need something to keep them busy.

Alan is in his 17th year of teaching business courses at Kenmare High School and also does a lot of reffing there.

Barb is also employed by the school system and Kevin is in the sixth grade, so they all go to school together. They spend their summers in Tuttle where they help with the farming and with Art's garden.

Linda quit teaching after 11 years and went into the computer world. She is a programmer in the Secretary of State Office in Austin, Texas and is really involved in Software. She enjoys it a lot. Les continues to teach and do research at the University of Texas.

Steve graduated from U.N.D. with a degree in Computer Science. He did computer work in Chicago for three years, and then moved to Bismarck where he is Systems Analyst at Basin Electric.

Steve married Anne Subart, a Robinson native, on Sept. 7, 1985. They have a country home south of Bismarck. Anne works at St. Alexius Medical Center.

This brings the family up to Fall of 1985. Lynora and Art are still living in their big house west of Tuttle School. Art is talking retirement, if he can swing it. They shall see! They do a lot of traveling for the past 15 years but home seems better to them all the time.

The highlight of their lives is when the kids come home to visit or to work. They especially enjoy Kevin, their only grandchild.
